### FOR THE FOLLOWING PROPERTY:

All records associated with mobile number \_\_\_\_\_  
for the dates of \_\_\_\_\_ to \_\_\_\_\_

\*If the number is not associated with a subscriber on your network you are ordered to process this request as a "Call and Text to Destination" search that is to include all calls, text, text message content, voicemails, and cell-site and sector information related to each call or text.

This request includes:

1. **Specialized Location Records:** All call, voice, text (SMS & MMS), and data connection location information and transactions (registration of network events), related to all specialized carrier records that may be referred to as LOCDBOR (Location Database of Record), Historical Precision Location Information, Historical Mobile Locate (HML), vMLC (Virtual Mobile Locate - vLMC3, vMLC4, vMLC5), NELOS (Network Event Location System), RTT (Round Trip Time/Return Trip Time/Real Time Tool), PCMD (Per Call Measurement Data), TDOA (Time Difference of Arrival) or Timing Advance Information, Mediation Records, E9-1-1, and/or Historical GPS/Mobile Locate Information which shows GPS location (longitude and latitude) and Cell-Site and sector of the device in relationship to the network when connected to the network for the above referenced number.
2. **Call/Text/Data Detail Records:** All records associated, also to include all numbers that communicate with this listed number relating to all delivered and undelivered inbound and outbound calls, text messages, and text message content to any of the above listed numbers, all voice mail, and all data connections to include Cell-site and sector, date, time, direction, duration, number called or text to and/or received from, and bytes up/down, information related to each call, text or data connection, all text message content, and voicemails, as well as Call to Destination/Dialed Digits search for all numbers listed above. Please preserve all cell-site and sector information related to each call, text or data connections.
3. **FCC TRACED Act STIR/SHAKEN Authentication Standard:** All records related to the FCC TRACED (Telephone Robocall Abuse Criminal Enforcement and Deterrence) Act, STIR/SHAKEN caller identification framework, identifying all incoming Voice, Text Message Service (SMS) and Multi-Media Service (MMS) traffic, and whether or not the caller ID passed or failed authentication. The report shall include the date, time (with time zone), originating and terminating numbers in their original state prior to Stir/Shaken

authentication, the status whether it passed or failed authentication, the Attestation type, and the originating and terminating verified number that was used to validate Stir/Shaken Caller ID authentication. The report shall provide all usage events, even if the incoming usage event was blocked and flagged by the service provider (or other third-party entities), prior to delivery to the identified target mobile number.

4. **Time on Tower and/or Sector:** Also provide all cell-site and sector information related to each number called to and/or received from, and data connections, specific to the **"Time on Tower" and/or Sector**, to include information with the start and end date and time for each time the connection was involved in a **"hand-off"** to another cell-site and/or sector, to include the elapsed time (in seconds) for each **"hand-off"**, that was used during and throughout each voice call (whether completed or not), and/or which was used during and throughout each data session.
5. **Electronically Stored Records:** All records, to include all stored communication or files, including voice mail, text messages, including numbers text to and received from and all related content, e-mail, digital images (e.g. pictures), contact lists, video calling, web activity (name of web site or application visited or accessed), domain accessed, data connections (to include Internet Service Providers (ISPs), Internet protocol (IP) addresses, (IP) Session data, (IP) Destination Data, bookmarks, data sessions, name of web sites and/or applications accessed), date and time when all web sites, applications, and/or third party applications were accessed and the duration of each web site, application, and/or third party application was accessed, and any other files including all cell site and sector information associated with each connection and/or record.
6. **Carrier Key** related to call detail, text messages, data connections, IP logs, IP Sessions, web site and/or application connections, and cell site information. The "carrier key" is a legend related to the types of responsive data received from the service provider, which contain the record column header labels and their definitions of what each cell value represents in the spreadsheet. Carrier keys are required to decipher what the values represent in these cells, as many of these values may be presented in codes only known to the service provider.
7. **Cell Site List(s):** List of all cell-sites for all state(s) in which the above records used cell locations during the timeframe listed. Cell site lists to include switch, cell-site number, name, physical address, longitude and latitude, all sectors associated with each cell-site, azimuth, and beam-width of each related sector. If multiple technologies (CDMA, UMTS, GSM, LTE etc.) are referenced in the records, all appropriate corresponding cell site lists will also be provided.

8. **Subscriber Records:** All information including:

0. All Subscriber information to include name, tax identification number (social security number or employer identification number).
1. Physical address, mailing addresses, residential addresses, business addresses, e-mail addresses and any other address information.
2. All numbers associated with account.
3. Billing records.
4. All Authorized users on the associated account.
5. Activation date and termination date of each device associated with the account and above listed number(s).
6. Types of service subscriber utilized (e.g. A-list, AT&T Messages, friends and family).
